Christopher Nolan's *Interstellar* is one of the most ambitious, visually spectacular films I've seen this year. But it's also a film with some really deep problems. In many ways, it highlights Nolan's best and worst tendencies: his penchant for intricate, convoluted stories, his tendency to elide character work to move the plot along, and his knack for breathtaking visuals.

Hit the jump for my full video review of *Interstellar*. I discuss basic plot details about the film, but nothing I would consider spoilers. That being said, consider yourself warned.
